SECRETARY TRACY'S NEW ORDER.

leorganizing the Navy Department-Albert Fink's Resignation Saicide of Dr. Eugene Thayer-Boys Drowned.

Bosrox, June 27.—At a meeting of the Harvard chapter of the Pbg Beta Kappa to-day, Hon. Edward J. Phelps delivered the oration, in which he dealt largely with nternational affairs. He declared that the line had come when a consistent, dis-inctive and definite American policy in regard to international relations should be inclive and definite American policy in regard to international relations should be established, one that would not change with the extigency of politics. "It should prefer the right to the expedient; it should neither be aggressive nor offensive; fair towards others while just to ourselves; invading no right we ourselves would not surrender; establishing no precedent we may afterwards wish to evade. Upon a line thus deliberately considered our stand should be absolute, immand univioling. We cannot afford to obtain party advantages at the expense of just foreign relations, but for the maintenance of a more effectual foreign policy it is not enough that it should be just and well considered and that we should be united in support of it at home, we must likewise be known to be strong enough to inforce it. At home we safely dely the world at arms, but by land we shall never be attacked. If ever we are so unfortunate as to be involved in a war with any country great chough to go by sae, the issue must be determined upon the sor and not upon the sors and not upon the shore. I would propose, therefore, as the first stop towards such an international attitude as it seems that our country should assume, and having assumed such an attitude, is to see that a naval force should be created that should leave us to the Eirst stop towards such an international attitude as it seems that our country should assume, and having assumed such an attitude, is to see that a naval force should be created that should leave us nothing to fear from collision with any other naval power in the world. Arbitration is one of the most plausible words in the English language; but it means one thing to those who have not. Nevertheless, imperfect remode as it is, it will continue to be sometimes employed in a certain class of international disputes, especially in the adjustment of ranney caims, only public and private, but the idea that it can ever be made an ultimate resort in those more lapartant quarries that in crolve questions of principle or stablished, one that would not change with

Reorganizing the Navy Department. Washington, June T.—By a sweeping general order issued to day Secretary Trucy has directed an entire reorganization of the business methods of the navy department. Up to this time the new equipments and new duties constantly arising from the change incident to the replacement of the old wooden vessels with new slaps and modern guns have been as a pod here to several bureaus of the department, often with no better reason than the convenience of the moment. The result has been confusion and an exaggnation of the defects of the bureau system. Butles which have no connection have been placed together and those naturally counceted of the business methods of the navy depart

If all the reports of Keene's successful manipulations since his failure were true, he would be worth more than \$15,000,000, which he once exhibited as personal assets to his two chunes, Ward and Barlow. The truit is that just now Keene is taking more interest in races than stocks, and frequently he donast't trouble. Wall street with his presence for days.
